

GeoGrid.

The underlining principles of viable walls.

Dependable **GeoGrid**, available in a wide variety of strengths, and the finer-patterned **GeoFace** are Geostar's polyester grid lines. Connection tested with all major SRW products, this is the stuff viability is made of and technical data is readily available that proves it.

And both, like all Geostar products, are strategically positioned by purpose, price, proximity and performance.

We have what you need, you can afford it, we can get it to you, and you'll get more than you need from it.

All proven.
