- General Notes:**
- Street trees shall be located within the front yards of each lot. No trees shall be located within the right-of-way.
 - Street trees shall be located no closer than fifteen (15) feet of the back of the street.
 - Street trees shall be located within five (5) feet of an underground utility or lateral line.
 - Street trees shall not be placed within twenty-five (25) feet of any street light.
 - Street trees shall not be planted within ten (10) feet of street stormwater inlets or manholes.
 - All Common Ground plantings will be maintained by the Home Owners Association of the Sommerlin Subdivision.
 - Actual locations of plantings shown may vary based upon the final approved locations of utilities, sewer laterals, street lights, driveways, curb inlets, etc.
 - Plantings shown shall in no way affect or alter intended surface runoff or drainage. Plant materials shall be installed in a manner consistent with positive surface drainage.
 - Individual landscaping of each lot with shrubs, ground covers, grasses, annual flowers, etc. will be selected and completed by home buyers based on their individual preferences.

Landscape Requirements:

- Street Tree Requirements:** A minimum of one (1) 2" caliper canopy tree shall be planted for each lot. Corner lots shall have one (1) such tree in the front yard of each street on which the lot has frontage.
Calcs: 80 lots plus 2 corner lots = 82 trees required
Trees Proposed: 82 trees plus additional 28 trees within common ground abutting proposed streets = Total of 110 trees
- Street Tree Requirement along frontages of Hwy. DD and Sommers Road:**
Hwy DD Frontage: 923 lin. ft. = 19 trees (34+ proposed, deciduous & evergreen trees) / 50'
Sommers Road Frontage: 828 lin. ft. = 17 trees (23+ proposed deciduous & evergreen trees) / 50'
- Proposed Landscape Buffers & Common Ground:** Total of additional 184 trees made up of: deciduous & evergreen trees
- Tree Preservation Note:** The only trees existing on the subject tract are located in narrow "hedgerows" along the Hwy. DD frontage, along Fox Wood Drive and intermittently along the driveway which provides access to the residence at the rear of # 2557 Sommers Road. Approximately 87 existing trees along Fox Wood Drive, ranging in size from 6" caliper up to 42" caliper shall be retained and will be supplemented with additional new plant materials as shown hereon.
- Tree Preservation Calculations:**
Total Number of Existing Trees On Site: 171 trees
Required Number of Trees to Be Retained: A minimum of 35 trees (based on 20% of 171 trees)
Note: Based on alternate criteria: A minimum of 15 trees per acre (15 x 24.6 acs.) = 368 trees must be retained. This is more trees than currently exist on the site prior to construction.
Number of Trees to be Removed: 84 Trees (49%)
Number of Existing Trees to Be Retained: 87 Trees (51%)
Total Number of Trees Proposed To be Retained and Planted: 449 Trees (made up of 362 new trees and 87 existing trees to be retained).
